

A group of hands from different people are raised and joined together to form a circle. The background is a warm, golden glow, suggesting a sunrise or sunset. The text 'POWER of WE' is centered within the circle of hands.

POWER
of **WE**

$$1 + 1 = 3$$

We All

- With PoWEr-of-WE we explore and use the great creative power within us – alone, in groups and in larger contexts. In personal life and at work.
- WE ALL are part of the great human family. We live in an unlimited space of consciousness of permanent connectedness. Our physical genetic material, DNA, exists in the quantum entangled field beyond space-time.
- What we do, think and feel, we experience together. Numerous research projects over the past few decades have proven it: every single thought has the potential to change the world. An innovative wave of energy can spark inspirational swarm movements that humanity responds to.

Power of Education

STEM to STEAM

Technology is driving transformation and innovation in industries. Taking over repetitive tasks through automation and becoming more human-like than ever.

Certain soft skills a computer simply cannot replicate – teamwork, cooperation, creativity, etc.

Incorporating the study of the humanities, language arts, dance, drama, music, visual arts, design, new media and more leads to different approaches in finding solutions.

Every person takes responsibility for their own development path.

Power of Art

The A in STEAM

Just as every country has a variety of forms within it, every human life also has numerous possibilities for shaping itself. It often takes new encounters to bring to life what is inherent in one's being - it takes interaction to allow something new to emerge, to give form to something previously hidden.

Power of Health

All health arises from consciousness.

Thoughts, feelings, physicality. Our thinking determines our feelings, and the body realizes the energy.

This is said with deep respect and compassion for every sick person and without judgment or blame.

Understand the enormous power of thoughts and use them for the highest good of all being.

Power of Business

Company health – healthy company. Successful companies respect the laws of health. Mutual support and assistance in the team. Respectful interpersonal relationships. Content-defined hierarchies in mutual respect. Win-win conditions that create satisfaction. Healthy finances. Sustainability. The consideration of larger contexts in decision-making processes.

This is how sustainably healthy companies are created that serve life and humanity.

A person's hands are shown holding a woven basket filled with fresh, vibrant vegetables. The basket contains a large head of green lettuce, several bunches of green onions, a bunch of red radishes, several red tomatoes, and several green cucumbers. The background is a soft-focus outdoor setting with green grass and a wooden fence.

Power of Food

Our life is made of energy. Daily nourishment nourishes and strengthens us.

POWEr-of-Food promotes sustainable, regional cultivation that ensures the health of people, animals, plants and planet earth. We offer suggestions for top-class healthy cuisine: e.g., 5 elements raise every meal to a pleasurable level for body, soul and spirit.

And there is enough food for all, presently not distributed evenly though; time to change.

Power of Living

Initiating and supporting the establishment of peacefully sustainable living spaces.

We are here as members of one human family. We respect and recognize all related sisters and brothers worldwide in their respective cultures.

We cultivate peaceful communication in encounters and discussions.

Together we submit to peaceful service to life in all its manifestations.

We protect and promote planet earth with its creatures.

Power of Spirit

All visible and not (yet) visible creations arise in consciousness. Mind and matter are only different expressions of the same force.

Consciously directed energy creates light. Photon light condenses into matter. When consciousness chooses to dissolve its matter expression, it transforms form into light and energy. We call this moment enlightenment: the mind fills with light.

We support all living things and consciously direct our attention. We stay in the view of love – in thinking, feeling and BEING.

The Global Consciousness Project and the Maharishi Effect prove it: when 1% of humanity is in a peaceful loving state, the world becomes more harmonious.
